EMPRESS MINE SHOWINGS GIVE ENCOURAGEMENT

The Empress mine present a busy scene these days as arrangements go forward in the installing of new machinery to develop the property.

A new combined compressor house and machine shop with concrete foundations has just been completed. They are installing a 75-horsepower hoist and another 460-foot compressor. Plans are to start sinking operations about July 15 and sink to the 1000-foot level. A new pump has been installed on the 400-level and completely new equipmnt will be used in sinking operations.

The two-compartment shaft is now down 437 feet with three levels cut in. On the 150-foot level in the old workings a drift was run 200 feet to the west and 370 feet east. At this depth the vein is from 12 to 16 feet wide, according to officials.

On the 400-foot level they have drifted to the west 200 feet and to the east 400 feet. The vein at this depth is said to range from 14 to 18 feet in width with ore averaging about $27 to the ton in gold.

On the surface the vein was about four feet wide and on the 437-foot level it averages about 15 feet. It runs in an easterly and westerly direction and is a true fissure vein. The foot wall vein is eight feet wide and carries the same values as the hanging wall, where the vein is 14 to 18 feet wide. The foot wall vein is undeveloped.

The company has in operation a 100-ton daily capacity oil flotation mill at the mine ,and has in its employ about 35 men.

The Empress property consists of a large acreage and should present explorations continue to show improvement with depth it is predicted that this property will become one of the largest producers in Nevada county.

This mine is one of the newer developments in the district, having been in operation a little more than a year. The property is situated four and one-half miles west of Nevada City and is under the superintendency of Ed. C. Jacobs.

—O—

BANK OF AMERICA SHOWS GAIN IN DEPOSITS

Increase in deposits of $51,600,000 with 130,000 new depositors added since the return of Bank of America to California management and control is reported by the bank in a combined statement of condition published today. Deposits are shown to have increased to $710,903,000 from $659,222,000 on March 12, at which time the business building campaign was inaugurated.

Earnings of more than $2,800,000 were realized for the period ending June 30, of which $1,120,000 was utilized for depreciation and bank premises and fixtures. Undivided profits were increased to $6,250,048 during this period and reserves for losses and contingencies brought to $11,183,467 by a transfer of $10,000,000 from surplus account.

It is stated that the full benefit of increased deposits and economies in operations effected by the present management since March, should be reflected to an even greater extent in the earnings of the bank for the last half of the year, which is normally a period of substantial increase in deposits and earnings.

"These satisfactory constructive accomplishments have been made possible through the interested, united and loyal support and cooperation of our entire organization, stockholders and friends. The economies have been effected in a manner calculated not to aggravate the existing distressing unemployment situation, but at the same time accomplish necessary savings in the interest of our stockholders," said A. P. Giannini, chairman of the board of directors, in commenting on the progress of the bank since the recent proxy contest.

"We have pursued the policy of conducting the bank's affairs in a normal sane manner and have without exception cared for all legitimate credit requirements of our clients. We have especially encouraged the building of small homes by making installment loans for new construction.

"It has been our old established policy to invest a very substantial portion of our savings deposits in installment first mortgage loans on improved California real estate. The wisdom of this policy has been clearly demonstrated throughout the depression by the fact that the shrinkage in this type of investment has been less than in any other type of security with the exception of United States government bonds, another of our major investments."

—O—

OPTION IS TAKEN ON SOUTH JACKSON MINE

The Vina Madre Metals Corporation has an agreement with James E. Davis and others, trustees of the South Jackson Mining Co., which gives them an option to purchase the South Jackson Mine. This property, which is close to Jackson, has been idle for a number of years.

More Men at Work at Gold Hub in Downieville

Another crew has started work at the Gold Hub mine at Downieville, framing a station on the 80-foot level, where high grade ore was opened last fall just before work was suspended for the season. A. D. Hinton of Dobbins, president and general manager of the company, says that 80 feet of backs are available ,and a raise will be driven on the ore, to be followed by sinking. Later, another tunnel will be driven at a lower level and approximately 1000 feet of backs will be available by a 1500-foot tunnel. For some time four men have been working the mine under lease.

—O—

NEW HOIST INSTALLED AT ARGONAUT MINE

Sinking operations are in progress at the Argonaut mine, near Jackson, from the 5,500-foot level, where a new hoist was recently installed to take care of the main haulage in the new shaft.

The hoist, designed by D. V. Ramazzotti and constructed by Knight Company at Sutter Creek, is a double drum hoist driven by a 150-horsepower motor, capable of hauling a load of 18,000 pounds. The drums are built to hold 3,500 feet of one and one-eighth inch cable, and all safety devices and "Lily" controls have been included in the job.

The Argonaut mine is one of the most important as well as largest mines in Amador county. It is also one of the deepest gold mines in the state of California with a good past production record.

—O—

BUTTE COUNTY MINES SHOWING ACTIVITY

Proof of labor on 28 mining claims totaling $6,000 were filed for record with the county recorder in Butte county in the last few days. Practically all of this work was done on placer claims.

Charles Clark of Corning, while looking over the old dump of the Cherokee mine near Oroville, recently picked up a diamond in the rough from the tailings.

Development of the shallow mine in the Bangor district, 14 miles from Oroville, from which some rich specimens were taken recently, is progressing. F. F. Ford, one of the owners, announces that the ledge has been exposed to a depth of 20 feet and has been followed a distance of more than 600 feet.

Work consists of cleaning drifts cut by former prospectors in order to arrive at an estimate of the extent of the ledge. It was at first believed that the find was in the nature of a pocket, but present development is convincing the owners that the ore body is of considerable size.

Tom Miller of the Bidwell Bar district has been exhibiting two nuggets valued at $15 and $27.10, respectively, taken from his claim. He is installing a gasoline-driven pump at his property.

Milligan, Conger, Timmons and Osgood of Berkeley, have their shaft down 55 feet on their claim near Bangor. The shaft is timbered for 38 feet, and will be sunk until bedrock is reached.

MRS. H. T. GRAHAM DIES AT STOCKTON

Mrs. Honora Teresa Graham, one of Nevada county's earliest natives, having been born in Cherokee in October, 1855, died at her home in Stockton June 27. All the earlier yaers of her life were spent in Nevada county, where she was twice married, her first husband, John Goffette, died many years ago, Later she married James Graham of Selby Flat section.

Born of pioneer parents at a time when the county was but sparsely settled, Mrs. Graham grew to womanhood amid the surroundings of those earlier days of the county's history. She was well known and lover by all.

—O—

INCREASES CREW

Manager E. E. Erich has increased his crew to 18 men at the old Brown Bear mine, near French Gulch.

NORAMBAGUA MINE PASSES TO NEW HANDS

The Grass Valley Gold, Inc.., a corporation with capital of two and one-half million shares has been formed in Nevada to operate the Norambagua mine near Grass Valley. H. W. Robinson, former manager of the San Francisco branch of the Fleischman Yeast Co., and now a resident of Grass Valley, is president; A. B. Archibald, Grass Valley mine operater ,is vice-president and general manager, and S. D. Stoufer of Berkeley, is secretary-treasurer.

Besides the Norambagua ,the company owns the Slate Ldge and Prudential mines, adjoining, four and one-half miles south of the North Star mine of the Newmont Mining Corporation, in the Allison Ranch district, and is said to be acquiring 300 acres additional mineral lands, making a compact group of approximately 1000 acres.

The workings extend to a depth of 1250 feet and have all produced gold ore of good grade. The adjoining Allison Ranch mine, now reported under option to the Newmont corporation, has produced $7,500,000 It is on the big contact along which are found the rich ore bodies of the North Star.

—O—

MONTE CHRISTO WINS LAW SUIT; WORK RESUMES

The New Monte Christo Co. won a cleancut victory in the decisions handed down this week by Judge Raglan Tuttle.

With litigation ended between the Alcalde Mines Co. and the New Monte Christo Mining Co. in favor of the latter, of which J. Berber of San Francisco is principal stockholder, the way is now opened for a continuance of the development of the mining property in the Deadman Flat district.

According to the judgment the New Monte Christo Co. is entitled to the property under the original terms of the lease and in the second judgment affirmed the right of Mr. Berger to his lease to the property from the New Monte Christo Company.

Mr. Berger, who is the main New Monte Christo Mining Co. stockholder, sued the company for a quiet title claim. The result of this suit depends upon the result of the first suit and when the New Monte Christo Co. won the suit, Mr. Berger's lease was automatically affirmed.

Litigation stopped development work at this property two years ago and it will now be resumed under the direction of Michael McGuire. Mr. Berger states that development work will be pushed at a rapid rate. A three-compartment shaft will be sunk to a depth of several hundred feet where drifts will be run to determine the values.

The resumption of mining at the Alcalde mine on Deadman's Flat, east of Rough and Ready, is expected soon as the result of a superior court decision rendered recently. Under the decision the New Monte Cristo Mining Company, of which Jacob Berger is the principal stockholder, is given control of the property under the terms of a lease and bond from the Alcalde Mining Co. A lease arrangement between the Monte Cristo company and Mr. Berger is also validated.

The Alcalde, formerly known as the Seven-Thirty mine, has been a notable producer of high grade and specimen ore at different periods. Several years ago is was optioned by the late George W. Root to C. C. Julian, the oil magnate, and legal complications growing out of that transaction served to keep the property inactive.

The Mattie Mining Company holds a 20-year lease on the ground.

—O—

GOLD MINE NAMES MAY BE USED AS TRADE NAMES

So popular has gold mining become in California within the last few months that the Bercut-Richards Packing Co. has sent a request to the Grass Valley Chamber of Commerce for a list of names of outstanding mines to be used as labels on California fresh and canned fruits and vegetables.

California's golden, sunkist fruit will bear the names of famous gold producing mines. So the influence from the romance of our 49er history is spreading in ever widening circles. What would be more attractive than Golden Empress, Queen of the North Star, Idaho-Maryland, Pride of the West and so on?

—O—

HONEY LAKE MINE INSTALLS NEW CRUSHING MILL

H. Sundberg, manager of the Honey Lake mine near Milford, has announced the construction of a crushing mill and a new blacksmith shop. Thomas Walhstrom, electrical engineer of Susanville, accompanied Mr. Sundberg to Tonopah recently to inspect a power plant.

CELEBRATION OF FOURTH VOTED HUGE SUCCESS

Nevada City entertained its friends and guests for the three-day celebration of the Fourth and it is unanimously agreed that this ctiy outdid its former efforts in staging entertainment.

The festivities began Saturday evening with the baby show, in which 25 youngsters participated. The winners for this event were Beverly Elaine Flynn, Jerry Cullen of San Francisco, Irene Livia Barberi and Patricia Anne Dunn.

The skeet shoot was the feature on Sunday, with participants entered from many points, with three of the four class prizes going to Nevada Cityans. Charles A. Clark of Tracy was the winner in class A with 48 out of 50 birds; Curtis Clark of Nevada City being second with 47. Sargent Huson, winner of the Northern California class B title in May, was first in class B with 42 out of 50. John Tognerelli scored 40 in this class. District Attorney Wright scored 40 to win in class C over Sheriff Carter with 37. Joe Roberts was awarded the loving cup in class D by scoring 34 out of 50 birds. The "miss-and-out" event was closely contested, Harry Fieckert taking the event 49 out of 50, with John Tognerelli second with 48. Perfect scores were made by Fieckert and C. A. Clark, for 25 out of 25.

Sunday evening witnessed a vaudeville show and band concert which were well attended and greatly enjoyed.

The parade on the Fourth was the outstanding event of the celebration. Led by Grand Marshal R. N. McCormack and his aides the many floats, bands and drum corps presented a spectacle which was view by throngs lining the streets. Grass Valley entries in the parade comprised a large part of the parade and added greatly to the success of the event. In all there were more than 40 separate entries in the line of march. Three bands, the High School, Miners and Columbia Park with the American Legion drum corps and the Native Sons drum corps, combined with an orchestra on the float of the Electric Welding Works furnished music for the event.

The literary exercises following the parade were held at the auto camp under the presidency of Judge Raglan Tuttle and were enjoyed by many attendants. Invocation was given by Rev. Father P. O'Reilly, the address of the day being given by Rev. Arthur L. Pratt of Grass Valley. Music was furnished by the Miners band.

In the afternoon boxing bouts and a water fight between the Grass Valley and Nevada City fire departments was held at the Plaza. The evening was taken up by a band concert.

General Chairman Carl Tobiassen and the several committees are to be highly commended for the way in which the celebration was handled, all events being dispatched on time.

—O—

GOLD MINING OFFERS ENGINEER GOOD FIELD

Gold mining appears to present the most promising field for the employment of graduate mining engineers in the metal-mining industries during the next 20 years, stated Scott Turner, director of the U. S. Bureau of Mines, in addressing the graduating class at Michigan College of Mining and Technology, Houghton, Mich. If relatively low price levels continue, the increasing trend of gold production witnessed in 1930 and 1931 may be expected to continue, said Mr. Turner. This industry has probably supported more engineers than any other branch of mining, as gold mines are more numerous than any other kind.

Stressing the importace of gold in domestic metal-mining industry, Mr. Turner said that, out of a total of 2,262 deep nonferrous metal mines operating in the United States in a recent year, gold was the principal product in 1932. In addition, there were 1,202 placer-mining operations. So there were 2,134 gold producers out of a total of 3,464 nonferrous metal mines including placers. Lead was the principal product in 479 mines, silver in 333, zinc in 267, and copper in 251 mines. The number of iron mines operating in the United States was 211.

Another factor which will tend to make gold mining attractive to engineers is the ever-increasing demand for its product, Mr. Turner continued. It is inevitable that the gold supply must be maintained if not increased during the life-time of the present generation, and it seems that this can only be accomplished by constantly improving methods of extraction, both mining and metallurgical, so that lower and lower grades of ore can be worked profitably. This is one of the important responsibilities of the mining engineer to society.

—O—

RISE OF MOTOR VEHICLES

Less than 6,500 automobiles were to be found throughout all of California in 1905, while today there are more than 2,000,000 motor vehicles in operation in the state.

Sawyer's Bar Properties Sold to Seattle Group

The Interlock Consolidated Gold Mines Corporation, composed of A. R. Patterson and associates of Seattle, has acquired the Wike and Stevens mines, four miles from Sawyer's Bar. Road construction will be started soon and machinery taken in suitable for developing and mining ore. A quartz mill will also be built. Mr. Wike has been retained as mine superintendent under the new management. He says that two men in eight hours can be putting ore into the mill from a ledge three to six feet wide. Several of the Seattle associates were at the property recently and were very favorably impressed with what they saw.

—O—

INCREASED ACTIVITY IN CAMPTONVILLE AREA

Mining activity has picked up in the Camptonville area during the past few weeks, C. W. Almos and H. E. Wesner of Los Angeles have completed arrangements with M. G. Calvin for the operation of the Halkyard mine, and they contemplate starting immediately with a small crew of men. This is one of the promising gravel properties in the vicinity, located six miles north of Camptonville. More than 1,000 feet of tunnel has been run, and it is expected that they are only a short distance from pay gravel.

Frank Pendola has arrived from San Francisco and has started operations at the Honey Comb mine, one mile west of town. with a small crew of men, running the tunnel and doing other exploration work. The Honey Comb is a promising quartz property, the prospects of the making of a good producing mine.

John C. Donnelly and party passed through Camptonville Wednesday enroute to the True Grit mine, nine miles north of here, making an examination of the ground with expectations of start active work later on. Mr. Donnelly has had control of the True Grit for some time. A large yardage of gravel is held, which is said to possess very good prospects.

The number of prospectors has materially increased during the last few months, more and more people coming out from the cities to try their hand at sluicing for gold. In most cases there is not much encouragement, due to the lack of experience and principally that the ground has been worked in the early days, once by the pioneer, followed by the Chinese, leaving little or nothing for the third person.

—O—

ORLEANS CLAIMS TAKEN OVER BY NEW COMPANY

Further development of the Orleans group of claims will be begun as soon as the final legal papers are signed between the present owners and the United Empire Mining Company, who recently took over the property. There are more than 200 acres in this group of claims and it lies in a rich gold producing district just south of Nevada City.

Nathan Schiller, of the well-known Schiller family, who were merchants, bankers and cattlemen of San Diego, is president of the company and Frank Fisher is secretary-treasurer of the United Empire company. Mr. Fisher was formerly with the office of the commissioner of corporations and for several years was in the service of the federal government. Mr. Fisher will have an office in Nevada City.

EQUIPMENT BEING INSTALLED ON MOON RIVER GROUP

Acquisition of a bond and lease on the Moon River group of gravel claims near Downieville has been reported by George A. Renner of San Francisco. Work will be started as soon as equipment is installed, and will be as extensive as practical. It is planned to work more than 200 feet of river channel and a drift run to the ancient river channel on Moon River flat.

MYNOUGH RANCH DEAL NEARS COMPLETION

Presaging a gold mining boom of the greatest proportions, eclipsing even the days experienced by this camp during the days of '49, George Wingfield, with his engineers Ralph Knowland and A. E. Julian, who also are said to be representatives of D. C. Jackling, all of Nevada, spent several days looking over properties near Nevada City, and rumor has been prevalent that negotiations are nearly completed for the purchase of the Mynough ranch, four miles west of Nevada City.

The property consists of a large acreage, which, mining engineers and geologists state, is one of the most highly promising undeveloped properties in this section. Some development work has been done but operations have not progressed far enough to determine the extent of th production possibilities.

According to mining men who have looked over the district, the Mynough ranch lies on the general trend on which are located the Idaho-Maryland mine and the Empress, which latter property it adjoins on the south.

The new owners of the Empress mine, Messrs. Jacobs and Kneen, and their associates, are doing much development work and, according to reports the new workings are showing excellent colors. The Idaho-Maryland, with its several consolidated properties, has a production record dating from the early fifties. Values of the production of the Idaho-Maryland exceeds $20,000,000.

This district has many producing mines and a greater number of former producers with large past production records, which through the use of the oil flotation methods and recent improvements, can again be placed on production schedules. Through the use of these processes old dumps and ore which did not lend themselves to the old methods of extracting the values can now be reclaimed and worked at a profit. Also the use of this method of recovery can be used on all ores whether of high or low-grade, with high percentage of recovery of values.

The ore in the Newtown section, in which the Mynough ranch is located, is known as refractory ore, and it was through experiments conducted by the Empress Mining Company that it was found that the oil flotation system not only separated the gold, but saved a higher percentage of the precious metal.

Should the Wingfield-Jackling interests enter this section the development and placing on production of properties for which they are negotiating, this activity will naturally attract the attention of many more capitalists to this section. The Nugget office is visited almost daily by mining men seeking information on properties for sale or lease and we understand there are several large deals in process of negotiation, but which can not be announced at the present time.

Mining men the world over need no introduction to Mr. Wingfield and Mr. Jackling, for their record as mining men is a long one.

Mr. Wingfield entered mining on a large scale when he was the prime mover in the Gold Consolidation Mines Co. at Goldfield, Nevada. The property is a consolidation of the Jumbo, Mohawk, Combination, Grizzy Bear, Claremont and several other properties. Through the genius and business ability of Mr. Wingfield this large venture was made possible of realization. The Gold Consolidation has paid more than $35,000,000 in dividends during the course of its operation. For many months this mine produced at a rate of more than $1,000,000 per month. During that period the stock rose from 10 cents a share to more than $35 per share. Mr. Wingfield has been connected with numerous mining ventures in Nevada, many of which became big producers.

Mining men all over Nevada are acquainted with Mr. Wingfield's outstanding friendliness to prospectors. It is said of Mr. Wingfield that he has grub-staked more miners than any other man. He also is connected with many other financial ventures not directly in the realm of mining.

Mr. Jackling is equally well known in mining and business circles. He is the founder and one of the largest stockholders of the great Utah Copper Co. of Bingham, Utah. He is also identified with many mines all over the United States.

Wih Wingfield and Jackling actively interested in this section it is inevitable that Nevada City and Nevada county will become the hub of mining interests from all over the world. It will again become, as in days of '49, the largest, most active, gold mining center in the world.

Nevada county is far-famed for its extensive deposits of gold. Mining engineers and geologists are loud in their affirmations that this county and the immediately surrounding territory is without doubt the richest section in mining properties in the world. We believe that through the development of the district Nevada county will experience a period of advancement that will outdo any previous time and will go far in relieving the country at large of its present difficulties.

FIRE HAZARDS CLOSE CERTAIN FOREST AREAS

Due to extreme fire hazards in the national forests, orders have just been issued by Regional Forester Shaw to close certain areas in some of the national forests. In the Angeles national forest the San Gabriel Canyon is closed to overnight camping except under permit. The Ralston Divide road on the Eldorado national forest is closed to vehicular travel. Closed to all uses except under permit are portions of the Cajon, Arrowhead ,Mill Creek and San Jacinto ranger districts and Banning Canyon on the San Bernardino national forest. The Blue Canyon area of the Sierra national forest and the Erickson Ridge area of the California national forest are similarly closed. Visitors are advised to inquire for details of the closures from local forest officers before entering these national forests.

TAHOE-UKIAH TO GET BLADE AND OIL SOON

The blading and oiling of the Tahoe-Ukiah highway from the end of the paved road near the Washington junction through the floor of Bear Valley was verified recently in a letter from Third District Engineer Charles H. Whitmore to the Grass Valley Chamber of Commerce.

This section will be bladed and oiled and placed in the best possible condition for summer travel, and the Emigrant Gap grade from the floor of the valley to the summit will be cleared of loose rocks, bladed and made entirely passable.

This gives the road excellent traffic conditions, while the 1933-34 budget which will include the completion of the eastern terminal, is being made up.

Mr. Whitmore states the work will start at the earliest opportunity, probably with the completion of the oiling of the Yuba Pass highway, which now extends between Camptonville and the Indian Valley bridge.

The Bear Valley grade was improved last year at a cost of $5,000. Improvement to the Emigrant Gap side will complete the temporary repairs and replacements necessary before the commencement of the final project.

0

Attractive Folder on Travel Is Received

An attractive 24-page, two-color folder reached us this week extoling the many benefits and pleasures to be derived from a vacation spent in California and Nevada. There are many prints of scenes to be found in the area and to look at the pictures gives one an urge to visit the originals and see for oneself the beauties pictured and described.

The folder is the literature of the California-Nevada Travels Association which is represented in this district by the Lake Tahoe-Sierra Association. A two-page map of the entire area covered by the folder is given, together with description of roads, camps and outstanding features of the eight districts comprising the area served by the association.

0

SCREEN SHOULD BE CLEANED

Oil stoppage and burned out bearing may result unless the screen in the oil pump is cleaned occasionally.

ALTA CALIFORNIA MEETING AT GRASS VALLEY SATURDAY

A meeting of boosters of Nevada and Sierra counties will gather at the Bret Harte Inn tomorrow at 11 a.m. to discuss ways and means of better publicizing the two counties on the extensive radio, newspaper and magazine publicity campaign being carried on by the Alta California, Inc., an organization composed of civic bodies of the 21 counties. The Grass Valley meeting is being held for the purpose of getting a more concise view of the highlight of Sierra and Nevada counties. The public is invited.

0

GOLD AS A DEPRESSION CURE

We cannot dwell too much upon the importance of the development of gold to answer many of the questions arising out of the depression and principally to relieve unemployment during the coming summer. Such times as the present always bring important discoveries which have helped to offset the ills of depression. The finding of new gold fields of importance and the attendant increase in gold production have always been followed by commodity inflation of considerable proportions.

The great Homesteak mine in the Black Hills was discovered during the financial collapse that followed the Civil War. This was also followed by the discovery of the Comstock Lode in Nevada and the great Australian developments at Ballarat and Coolgardie.

Cripple Creek, Colo., was brought to light during the slack period of the late 80's. During the same period came the discovery of the Rand in Africa which today accounts for two-thirds of the gold production.

The 1895 and 1896 depression was followed by discoveries on the Klondike and application of the cyanide process which made possible the treatment of millions of tons of low grade ore. The 1906 panic was followed by discoveries around Goldfield and Tonopah, Nevada.

Who will make the sensational discovery of this depression? Thousands are scouring the world now for new gold deposits and many will reap a rich harvest.—Oroville (Wash.) Gazette.

FEDERAL AUTO TAX NOW IN OPERATION

With the new federal revenue bill which went into effect Tuesday, June 21, the results of the new levies as they affect automobile owners will be closely studied and efforts continued to overcome features of the bill which are declared to be unfair and discriminatory, according to the California State Automobile Association. The measure provides for a one-cent per gallon federal tax on gasoline and various taxes on automotive products, such as taxes on new cars and trucks, parts and accessories, tires and tubes, as well as a tax of four cents a gallon on lubricating oil.

These levies were strongly opposed by organizezd motordom and the automobile industry. Various state legislatures have joined in protesting against the federal gasoline tax on the ground that it is an invasion of a state tax field and may have a serious effect on state road funds.

In contending that the revenue bill singles out the motorist to bear an unfairly large share of the new taxation, it is pointed out that the measure will exact approximately $258,000,000 a year from automobile owners, a sum amounting to 25 percent of the revenue to be raised.

The bill was passed, it is declared, under circumstances which caused Congress to ignore appeals for a fair and scientific distribution of the tax burden.

With the addition of $258,000,000 to the total of state taxes paid by motorists in 1931, the annual tax bill on car owners throughout the nation will amount to $1,283,000,000, exclusive of any increases in state taxes on motor vehicles which may be imposed this year, according to the association.

The federal gasoline tax was enacted for one year, while the other new automotive taxes are effective for two years.

YUBA RIVER COUNTRY

Yuba River Canyon

The canyon of the North Yuba river near Sierra City, the jagged sky-piercing Sierra Buttes, and the incomparably beautiful mountain lakes of that area are slowly becoming famous. For many years they were known to but a few hardy travelers who thought nothing of braving precipitous mountain trails and losing contact with civilization while among nature's rarest scenes. But today's oiled highway from Grass Valley to Downievilie and the federal highway, broad and sweeping, on to Sierra City and Lake countr yare bringing in a new type of nature lover. Perhaps the old timers are right when they bemoan the building of these highways and predict they are ruining one of the last strongholds of rugged nature and a splendrous past. To them the appeal of turquoise lakes set in the furtherest recesses of tremendous mountains, of frothing white water tumbling down falls, over cataracts and through gorges, are lessened when the solitude is broken. But perhaps nature lovers are nature lovers still even though they prefer the comforts of a smooth highway, good hotels and attractive and accessible camping spots.

Leaving Sierra Buttes Inn, the highway travels up Sierra City's main street with gigantic rock summit of the Buttes apparently teetering precariously overhead and the river roaring over the rocks far below to the right. Past the old 49'er hose cart, the post office, the homes on the flat below, the school house, and the road commences to sweep up towards the source of one of the greatest canyons in the west. The South Fork of the North Fork cuts a canyon to the west past the Wild Plum Forest Service camp ground. But the highway turns north and follows the North Fork through a narrow rocky gorge. On up past an old mining mill; across dozens of small streams that come tumbling down from the Buttes; to the great spring that gushes out of the very mountain side next to the road. Summer or winter, rainy season or dry, the water comes pouring out, its volume never shrinking. One guess is as good as another, but it is popularly believed that an under-ground passage way penetrates the tremendous Buttes and taps the bottom of one of the Sardine Lakes. Four miles from Sierra City is the junction of the Gold Lake road with the Yuba Pass highway. Here the green and white Forest Service signs point up the Gold Lake road, and list Packer Lake Lodge, Salmon Lake Resort, Gold Lake Lodge, Elwell Lake Lodge, Lake Center Camp, Gray Eagle Lodge. The Tahoe and Plumas National Forests have provided a large map approximately six feet high by four feet wide that gives in detail the lakes and other points between Sierra City and Blairsden, calling it the Lakes Basin Recreational area, where are shown the Sardine Lakes, Gold Lake, Bear, Round, Silver, Long, Mirror, Gray Eagle, Smith, Eureka, etc.

Proceeding east along the Yuba Pass highway we pass Bassett station and camp ground. From here the highway begins to climb gradually on towards the Yuba Pass summit. A few miles and Camp Pioneer is reached. Here Fred Simi, a disabled war veteran and his wife, have built a beautiful log cabin camp that is unique. Among other things is a Finnish steam bath that consists of a room with a table on which to stretch out or benches on which to sit. A small recess compartment is filled with boulders that have been heated. The proper procedure is to strip and then throw a dipper of water on the hot stones. A moment later the room is filled with steam—and how you do prespire! A hot and cold shower finishes the job.

Leaving Camp Pioneer the Masonic Camp grounds of Sierra county are passed and a few minutes later the summit, elevation 6,700 feet, is reached. The road now begins to drop and a sweeping view of the flat and very extensive Sierra Valley, surrounded by mountains, is obtained.

LEGAL NOTICE.

NOTICE INVITING SEALED PROPOSALS

On or before 12 o'clock noon July 9th, 1932, the undersigned Board of Education of Nevada City School District, will receive written proposals accompanied by specifications and bids for the construction or remodeling of a central heating plant at the Washington Grammar School, Nevada City, Cal.

Such proposals may be based upon either or both of the following plans:

(1) Remodeling and reconstructing the existing warm air heating plant, utilizing only such portion of present facilities as seem advisable, if any, and furnishing all necessary additions, including new furnace adapted to most efficient and economical fuel operation.

(2) Constructing an entirely new heating unit of such design and type as bidder may consider most efficient and economical for purpose indicated, and burning such fuel as seems most advantageous. In case oil is selected as fuel in either of these proposals, tank of a size best suited for economical purchase of fuel, to be included in bids.

All proposals and bids to be accompanied by such guarantees covering efficiency of operation, first class workmanship and material, as may be acceptable to the undersigned. The right is reserved of rejecting any or all bids.

Contractors desiring information regarding the above will please communicate with E. M. Rector, Nevada City, Cal. All bids to be addressed to H. A. Curnow, Clerk, Nevada City, Calif.

THE SUPERVISORS

Supervisor Eddy, who has served for a number of terms, is again a candidate for reelection. Mr. Eddy has given a splendid account of himself in the years has has been in office and will be a hard man to defeat. During the time he has been in office his district has progressed from a quiet little mining and agricultural community to a thriving section, there being several projects here that are being watched with pride. Among these are some rich producing mines and fruit and dairy ranches.

Frank Davies, popular business man of Nevada City, who has held a mail contract between this city and Alleghany, is the man who was given so much favorable comment last year, when, during the heavy snowfall, he never missed a day delivering the mail. He has held such contracts for many years and is thoroughly versed in road conditions in all seasons of the year. Mr. Davies is an enterprising business man who has lived in Nevada City many years.

Cary Abrogast, the third candidate, was born and reared in this section and the writer has never heard an unkind word of him in the several years it has been our privilge to know him. He is a man of cheerful, kindly ways at all times, always willings to lend a helping hand to whomsoever crosses his path and seems in need.

Nevada City township is indeed fortunate to have three men of such outstanding worth seeking this important office.

William Home, who visited his home in Scotland recently, has returned to the Lace House after a two years' absence and is being welcomed by old friends.

Mr. and Mrs. A. L. Pierce, of the North Star Mine, have moved into the James home, across from the Idaho-Maryland mine.

Mr. and Mrs. Gluyas Richards and daughters have returned to their home in Auburn after visiting Mrs. Richard's parents, Mr. and Mrs. A. Hartung.

Mr. and Mrs. Frank Hoge and children of Palo Alto were week-end guests of Mr. and Mrs. Arthur Hoge.

Mr. and Mrs. Ollie Cullens and children returned home after a vacation spent here with her uncle, Jas. Dolan and wife. Mr. Cullen

Mrs. Carrol Searls of New Rochelle, N. Y., and her sister, Mrs. Jane Rossen, left Monday for a visit in San Francisco.

Mr. and Mrs. McH. Isoard of Los Angeles visited old time friends here.

Mr. and Mrs. F. F. Cassidy and daughter, Miss Beatrice, were visitors at Lake Tahoe over the week-end.

Mrs. Merrill of the bay region visited her sisters, Mrs. Guenther and Mrs. Schwartz, Wednesday. She has been spending some time with her daughter, Mrs. Calvin in Grass Valley.

Visitors at the home of Judge and Mrs. R. Tuttle last week end were Mrs. F. Faulkner and sons of Sacramento ,and Mrs. Glendora Martin of Oroville.

NEWS IN BRIEF

Engagement Announced—

The engagement of C. Edward Pederson, former member of the faculty of the high school, to Miss Phoebe Tumwalt, is announced. Mr. Pederson will be employed at Toulumne high school the coming year.

Miss Helen Searls and brother, Niles Searls and son of Oakland, visited their mother, Mrs. Fred Searls recently.

Mr. and Mrs. Clay Epperson of Bakersfield spent last week-end with her parents, Mr. and Mrs. Charles Guenther.

Mrs. George Fortier had as week-end guests her son, George, and wife of Pacific Grove.

Mr. and Mrs. Arnold Murchie of Auburn spent the week-end with their parents in Nevada Ctiy.

Funeral Held—

The funeral of Mrs. C. A. Chapman, mother of Major F. H. Chapman, was held Sunday afternoon from the Holmes Funeral Home.

Mr. and Mrs. Roy Howell of the bay region, who are spending some time on their claims in the Washington district, visited Mr. and Mrs. James Dolan Tuesday.

Mr. and Mrs. R. M. Ewing, Mr. and Mrs. Will Davis, Miss Alice Davis and Frank Delaba were among a party that spent Monday in Marysville attending the celebration.

James Grimes, who is interested in the American Flag mine, came up from the bay district to spend the holidays.

C. E. Tegler of San Jose, former resident, spent the week-end here.

Judge and Mrs. F. J. Nilon were recent visitors in San Francisco.

Mr. and Mrs. Harry DeAna of Sacramento are spending a vacation at the Davis ranch in Willow Valley.

Mr. and Mrs. Henry Green and Roger Pryor motored up from Maxwell and spent the week-end with Mr. and Mrs. Ed. Martine.

Mr. and Mrs. E. J. N. Ott had as week-end guests Mr. and Mrs. E. J. N. Ott, Jr., Mr. and Mrs. Fred Yorke of Sacramento, and Mr. and Mrs. D. Murray of Los Angeles. The latter was formerly Miss Emma Ott of this city.
